Copenhagen, Denmark | +45 31 25 10 11 | d.breitkreuz@gmx.de  
<https://www.linkedin.com/in/david-breitkreuz/>

## PROFILE

Production & Materials Engineer with a background in composite materials, lightweight structures and mechanical design. Experience in composite manufacturing, mechanical testing and composite-metal joining, combined with industrial experience in product development and transfer to manufacturing.

## EDUCATION

M.Sc. Production and Materials Engineering, [Lund University, SE](#) **2020 – 2022**

- Master Thesis: Design of Cost-Efficient Joining Solutions for Composite-Metal Structure

B.Sc. Industrial Engineering, [University of Augsburg, DE](#) **2016 – 2020**

- Specialization: Design of Functional Materials – Lightweight Structures & Fiber-Reinforced Composites
- Bachelor Thesis: Investigations of Hybrid Nonwovens in Composite Manufacturing to Increase Permeability

Exchange Semester – Material Sciences, [University of Johannesburg, SA](#) **2018 – 2019**

## Selected University Projects

- Composite Wakeboard: Team-based design and hands-on manufacturing of a fiber-reinforced composite (Glassfibre, Non-wovens and Carbonfibre) wakeboard
- Carbon-Fibre Rocket Glider: Team-based design and hands-on manufacturing of a lightweight carbon-fibre rocket glider

## WORK EXPERIENCE

**Master Thesis – Structural Design & Materials Engineering** **Feb 2022 – Jun 2022**

[Volvo Bussar AB \(Gothenburg, SE\)](#)

- Developed and evaluated joining solutions for composite-metal structures using CAD, FEM and mechanical testing
- Conducted mechanical testing to evaluate joint behavior and load transfer
- Developed concepts considering structural performance and manufacturability

**Associate Production Design Transfer Engineer** **Feb 2023 – Jul 2023**

[Abbott \(Hamburg, DE\)](#)

- Supported transfer of medical device systems from R&D to manufacturing
- Supported system setup, troubleshooting and validation during production implementation
- Modified designs using CAD and maintained technical documentation
- Collaborated cross-functionally to improve product quality and process reliability

**Front of House** **Sep 2023 – Jul 2024**

[Mirabelle Spiseria \(Copenhagen, DK\)](#)

- Supported daily operations in a high-volume restaurant environment

**Office & Operations Administrator** **Jul 2024 – Dec 2025**

[Tavi ApS \(Copenhagen, DK\)](#)

- Managed operational processes and financial workflows across 3 locations
- Supported financial reporting by automating and structuring data workflows

**Operational Assistant Management (Part-Time)** **Jan 2026 – Present**

[ETH-Umweltservice GmbH \(Hamburg, DE, Remote\)](#)

- Supported environmental engineering projects in waste management
- Supported structuring of international contracts and operational workflows
- Introducing BI for improved reporting structures and operational data consistency

---

## Technical Skills

**CAD & Simulation:** CATIA V5, Creo, ANSYS Mechanical (FEM)

**Data & Programming:** MATLAB, Python, Excel

**Systems:** SAP

## Composite Materials and Manufacturing

Fiber-reinforced polymers, Composite manufacturing, Resin infusion, Permeability, Composite-metal joining, Mechanical testing, Lightweight Structures

## Languages

German (C2) | English (C2) | Danish (B2) | French (A2)

**Interests** Woodworking and hands-on building projects | outdoor sports (kitesurfing, fishing and running) | Ski Instructor (Austria & Japan)
